

REMARKS/ARGUMENTS

This is further to a telephone discussion with the Examiner Martin.

As requested, claim 28 is being further amended, to clarify that the filling port is connected to the groove network. The language used is that of "connected to the groove network so as to be in fluid communication therewith". It is understood that the claim as amended should be in order for allowance. This amendment is being entered solely to clarify the claim, to make it clear that the filling port is indeed intended to provide for fluid to flow through the filling port to the groove network.

Early review and allowance are requested.

Respectfully submitted,

BERESKIN & PARR
